Supporting Pupils with Medical Conditions Policy

DENE MAGNA SCHOOL

Policy name	Supporting Pupils with Medical Conditions Policy
Version date	March 2025
Owner	JR/JMo
Approval date	11th March 2025
Approver	Local Governing Board
Review frequency	Tri-Annually
Review date	March 2028

Aims

This policy aims to ensure that:

- Pupils, staff and parents/carers understand how our school will support pupils with medical conditions
- Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school trips and sporting activities

The governing board will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of pupils' conditions, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant pupils
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is the lead first aider.

Legislation and statutory responsibilities

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the Department for Education (DfE)'s statutory guidance on [supporting pupils with medical conditions at school](#).

This policy also complies with our funding agreement and articles of association.

Roles and responsibilities

The governing board

The governing board has ultimate responsibility to make arrangements to support pupils with medical conditions. The governing board will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

The headteacher

The headteacher will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Ensure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Ensure that all staff who need to know are aware of a child's condition
- Take overall responsibility for the development of IHPs

- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way
- Contact the school nursing service in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of 1 person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

Parents/carers

Parents/carers will:

- Provide the school with sufficient and up-to-date information about their child's medical needs
- Be involved in the development and review of their child's IHP and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP, e.g. provide medicines and equipment, and ensure they or another nominated adult are contactable at all times

Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

School nurses and other healthcare professionals

Our school nursing service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as GPs and paediatricians, will liaise with the school's nurses and notify them of any pupils identified as having a medical condition. They may also provide advice on developing IHPs.

Appointed person(s) and first aiders

The school's appointed person is Janine Moverley. They are responsible for:

- Taking charge when someone is injured or becomes ill
- Ensuring there is an adequate supply of medical materials in first aid kits, and replenishing the contents of these kits
- Ensuring that an ambulance or other professional medical help is summoned when appropriate

First aiders are trained and qualified to carry out the role (see section 7) and are responsible for:

- Acting as first responders to any incidents; they will assess the situation where there is an injured or ill person, and provide immediate and appropriate treatment
- Sending pupils home to recover, where necessary
- Filling in an accident report on the same day as, or as soon as is reasonably practicable, after an incident
- Keeping their contact details up to date

Our school's appointed person and first aiders are listed in appendix 2. Their names will also be displayed prominently around the school site.

Equal opportunities

Our school is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents/carers and any relevant healthcare professionals will be consulted.

Being notified that a child has a medical condition

When the school is notified that a pupil has a medical condition, the process outlined below will be followed to decide whether the pupil requires an IHP.

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our school.

See Appendix 1.

Individual healthcare plans (IHPs)

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. This has been delegated to the lead first aider.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents/carers when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents/carers and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any education, health and care (EHC) plan. If a pupil has special educational needs (SEN) but does not have an EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The governing board and lead first aider will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the pupil's condition and the support required
- Arrangements for written permission from parents/carers and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/carer or pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact and contingency arrangements

Managing medicines

Prescription and non-prescription medicines will only be administered at school:

- When it would be detrimental to the pupil's health or school attendance not to do so **and**

- Where we have parents/carers' written consent

The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents/carers.

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents/carers called for permission.

The school will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump and in the original container. This will be stored in a secure fridge in the medical room.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents/carers to arrange for safe disposal when no longer required.

Controlled drugs

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents/carers and it will be reflected in their IHPs.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a pupil to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents/carers so that an alternative option can be considered, if necessary.

Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents/carers
- Ignore medical evidence or opinion (although this may be challenged)
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs
- If the pupil becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable
- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g. hospital appointments
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- Require parents/carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent/carer should have to give up working because the school is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school trips, e.g. by requiring parents/carers to accompany their child
- Administer, or ask pupils to administer, medicine in school toilets

Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent/carer arrives, or accompany the pupil to hospital by ambulance.

First aid procedures

In-school procedures

In the event of an accident resulting in injury:

- The closest member of staff present will assess the seriousness of the injury and seek the assistance of a qualified first aider, if appropriate, who will provide the required first aid treatment
- The first aider, if called, will assess the injury and decide if further assistance is needed from a colleague or the emergency services. They will remain on the scene until help arrives
- The first aider will also decide whether the injured person should be moved or placed in a recovery position
- If the first aider judges that a pupil is too unwell to remain in school, parents/carers will be contacted and asked to collect their child. On their arrival, the first aider will recommend next steps to the parents/carers

- If emergency services are called, the school receptionist will contact parents/carers immediately
- The first aider/member of staff present at the time will complete an accident report form on the same day or as soon as is reasonably practicable after an incident resulting in an injury

Off-site procedures

When taking pupils off the school premises, staff will ensure they always have the following:

- A school mobile phone
- A portable first aid kit including, at minimum:
 - 6 individually wrapped sterile adhesive dressings
 - 1 large sterile un-medicated dressing
 - 2 triangular bandages – individually wrapped and preferably sterile
 - 2 safety pins
 - Individually wrapped moist cleansing wipes
 - 2 pairs of disposable gloves
- Information about the specific medical needs of pupils
- Parents/carers' contact details

When transporting pupils using a minibus or other large vehicle, the school will make sure the vehicle is equipped with a clearly marked first aid box containing, at minimum:

- 10 antiseptic wipes, foil packed
- 1 conforming disposable bandage (not less than 7.5cm wide)
- 2 triangular bandages
- 1 packet of 24 assorted adhesive dressings
- 3 large sterile un-medicated ambulance dressings (not less than 15cm × 20 cm)
- 2 sterile eye pads, with attachments
- 12 assorted safety pins
- 1 pair of rustproof blunt-ended scissors

Risk assessments will be completed by the **school trip organiser** prior to any educational visit that necessitates taking pupils off school premises.

There will always be at least 1 first aider on school trips and visits.

First aid equipment

A typical first aid kit in our school will include the following:

- A leaflet giving general advice on first aid
- 20 individually wrapped sterile adhesive dressings (assorted sizes)
- 2 sterile eye pads
- 2 individually wrapped triangular bandages (preferably sterile)
- 6 safety pins
- 6 medium-sized individually wrapped sterile unmedicated wound dressings
- 2 large sterile individually wrapped unmedicated wound dressings
- 3 pairs of disposable gloves

No medication is kept in first aid kits.

First aid kits are stored in:

- The medical room
- Reception
- All science prep room
- The school kitchen
- School minibuses

Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the lead first aider. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHPs
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

Record keeping

The governing board will ensure that written records are kept of all medicine administered to pupils for as long as these pupils are at the school. Parents/carers will be informed if their pupil has been unwell at school.

IHPs are kept in a readily accessible place that all staff are aware of.

Liability and indemnity

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are:

- Our Public and Employers Liability policy is with Zurich Insurance and runs September to August of each academic year

Complaints

Parents/carers with a complaint about the school's actions in regard to their child's medical condition should discuss these directly with the headteacher or lead first aider in the first instance.

If the headteacher or lead first aider cannot resolve the matter, they will direct parents/carers to the school's complaints procedure.

Monitoring arrangements

This policy will be reviewed and approved by the governing board every 3 years.
