

Welcome to Jenner House!

Our House motto is "Perseverance Breeds Success" and this is the one thing that I would like everyone to do – persevere!

If you are finding things difficult, don't give up, keep trying and eventually you will succeed!

It's not just about being the best house for academia or sporting prowess...it's about caring for each other, it's about being there for one another and working together.

All I ask of any student is that you do your best! If you can promise me that, then our house will be the best in the school.

Have a go at everything, whether it's: School work, Interhouse Sporting events, Music competitions, the Talent Show, Performing Arts Productions, Cooking competitions, Maths and English competitions, to name but a few. If every person tries their best, with a 'can do' attitude, we will be the most AMAZING house and become House Champions at the end of the year.

I can not wait to share and celebrate your successes!

Our house is named after Edward Jenner, a famous scientist from Berkeley, Gloucester who discovered the vaccination against Smallpox. In 1980, the World Health Organisation declared that the world is now free from Smallpox, a disease that once killed thousands of people every year, was beaten, thanks to Jenner's perseverance and hard work. If he were alive today, I'm certain he would have worked on a COVID vaccination too!

Many scientists laughed at his work, but Edward Jenner just didn't care what they were saying or what they thought of him...he knew he could do it and was determined to prove it.

People all over the world are now grateful for his hard work and persistence and he became respected and admired worldwide for his achievements. This epitomises our house motto – something that we could all learn from.

What do you want to be remembered for?

Miss Laura Burt
