

Medical Science Bridging Work

Write/type me approximately 300 words on why you want to study Medical Science. Within this I want you to make reference to something related to Medical Science that you have read/watched/listened to that you have found really interesting. If you're stuck for where to look try BBC Health <https://www.bbc.co.uk/news/health> , Medical Mavericks on YouTube <https://www.youtube.com/c/medicalmaverickstv1> or Medical Mavericks Magazine & Careers posters <https://medicalmavericks.co.uk/for-students/medical-mavericks-world/> or <https://medicalmavericks.co.uk/for-students/posters/secondary-posters/>

Also, the first unit in Medical Science is reliant on you having a good knowledge of chemistry (mainly chemical bonding). It would be a good idea to review you GCSE knowledge of covalent bonding and hydrocarbons.
