

## Subject Information

# A Level Geography

A Level Geography offers students the opportunity to develop a range of sophisticated skills whilst considering a variety of contexts. These contexts impart knowledge and understanding linked to many of the big issues facing human society today such as our finite resources and climate change. The A Level provides you with an opportunity to consider the physical and human world around us, but at this level in an in-depth and analytical way which offers up a wide variety of perspectives. The OCR specification we follow (launched in 2016) provides a modern take on this traditional academic subject making it relevant for the 21st century.

### Topics studied:

#### Landscape Systems:

- Glaciated Landscapes
- Water and Carbon Cycles
- Changing Spaces
- Migration

#### Geographical Debates:

- Diseases
- Climate Change
- Independent Investigation

### Entry requirements:

A minimum of GCSE grade 6 in Geography

### Location:

Cinderford Campus

### This course prepares you for a career in:

Cartography

Ecology

Surveying

Environmental management

Planning

Travel and tourism

Outdoor education

Journalism

Forestry

Agriculture

### Assessment:

Paper 1: Physical Systems (22%)

Paper 2: Human Interactions (22%)

Paper 3: Geographical Debates (36%)

Independent Investigation (20%)
